

Creator™ Series

Auto-Darkening Welding Helmets

283435
March 2024

Quick Specs

**2-YEAR
WARRANTY**

Viewing Field 3.82 x 1.85 in. (97 x 47 mm)

Shades Darkened state: #9–13, Light state: #3

Switching Speed 1/25,000 second

Operating Modes Weld and grind

Sensors 3

Weight 19 oz. (540 g)

Large 7.1-square-inch viewing area with wide screen format provides improved visibility.

Three independent arc sensors provide dependable arc detection.

Grind mode prevents lens from darkening for clear, visible grinding.

Headgear provides extensive adjustability settings.

Analog controls allow welder to easily adjust shade, sensitivity and delay.

Helmet accepts magnifying “cheater” lens (see Accessories on back page).

Auto-on/off power control triggers lens at the strike of an arc.

PureColor™ Lens Technology. Experience better visibility with accurate color and improved results.

100% continuous UV and IR protection.

Meets ANSI Z87.1-2015, CSA and CE EN379 standards.
